LEADERS IN CHILD HEALTH TECHNOLOGY

£23 million secured for the **UK's first National Centre for Child Health Technology, Sheffield**

UK's first

Robotics in Paediatrics and Child Health Showcase

UK's first 2 annual conferences dedicated to child health technology

106 speakers
384 delegates
27+ countries

ENGAGEMENT & DISSEMINATION

40 peer-reviewed papers published

127 newsletters published

showcased at **58** events

Twitter followers gained:

1409 NIHR CYP MedTech
1147 TITCH Network
488 CHT Conference

3044

68 conference & event presentations

GROWING AND EXPANDING OUR REACH

6 key themes established

4 websites launched

increased our capacity from

2 → 5

PROJECTS & COLLABORATION

£17 million leveraged in funding

81 funding applications submitted

Worked with **135** SMEs and **44** global companies

13 PhD students hosted

92 collaboration requests received

159 workshops, events & interviews engaging CYP & families

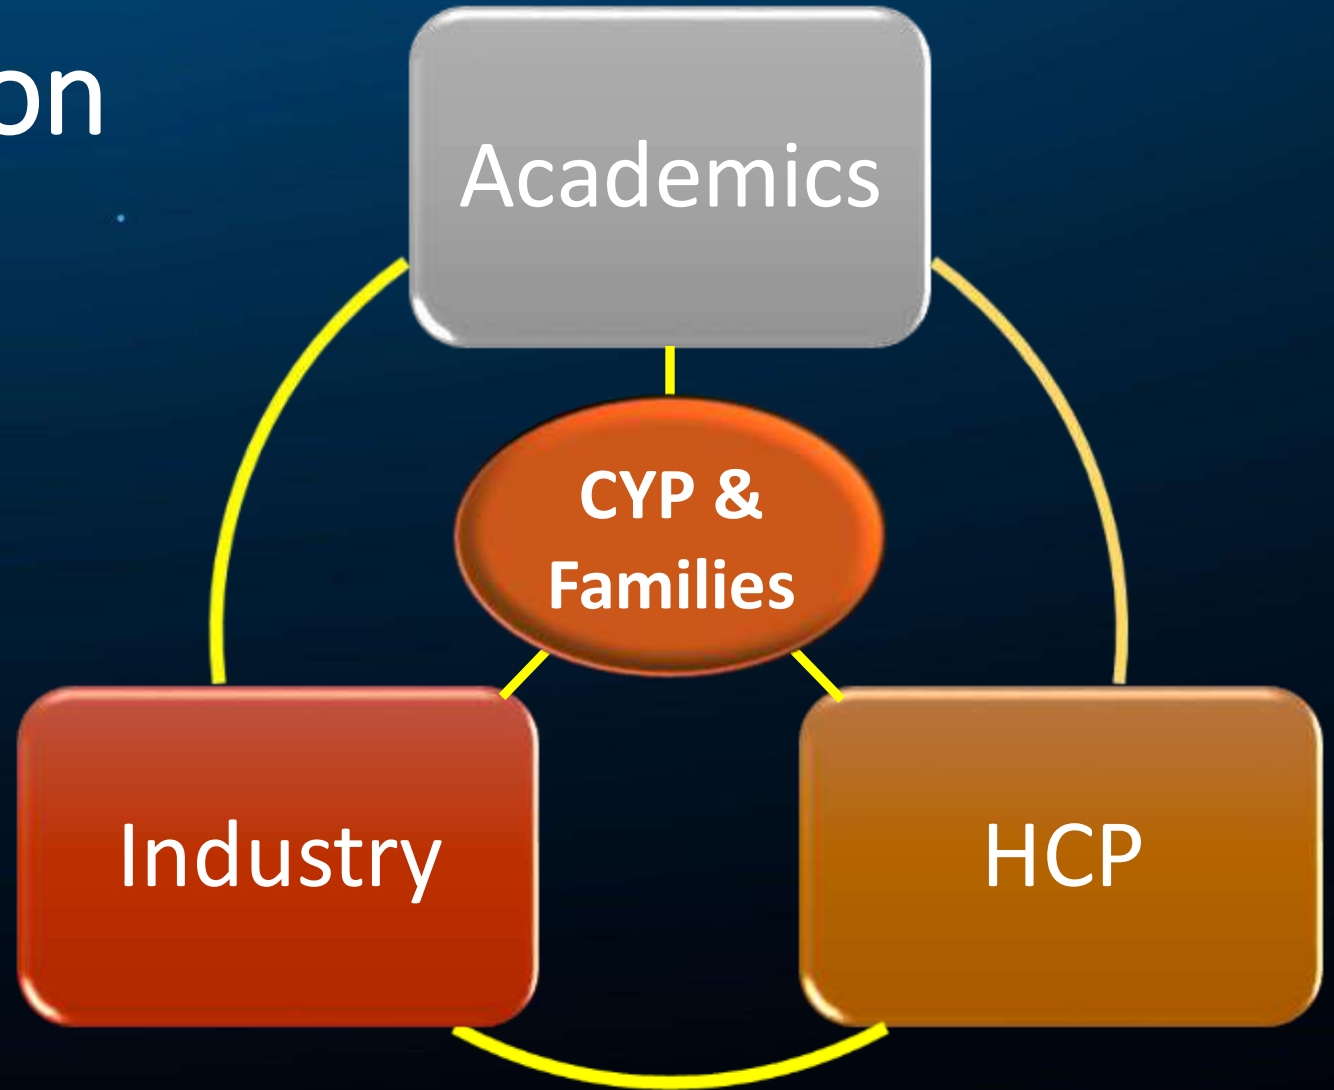

Of **176** projects worked on...

55% included an industry partner

13 projects with other NIHR MICs to support innovation in child health

Wheel of collaboration

Involving CYP & Families

TO KILL A MOCKINGBIRD HARPER LEE

You never really understand a person
until you consider things from his point of view...
Until you climb inside of his skin
and walk around in it.

- Via (The Minds Journal)

Thy

*“research...carried out ‘with’ or ‘by’ CYP & families
rather than ‘to’, ‘about’ or ‘for’ them”. (National
Institute for Health and Care Research)*

Research ON, ABOUT, WITH and BY children & young people

Mary Kellett was founder and Director of the Children's Research Centre at the Open University in the UK. She identified four types of research involving children in the research literature:

- Research **ON** children;
- Research **ABOUT** children;
- Research **WITH** children;
- Research **BY** children.

ARTICLE 12: You have the

United Nations Convention on the Rights of the Child

**right to
an opinion
and for it to be
listened to
and
taken
seriously.**

Child Rights & Technology

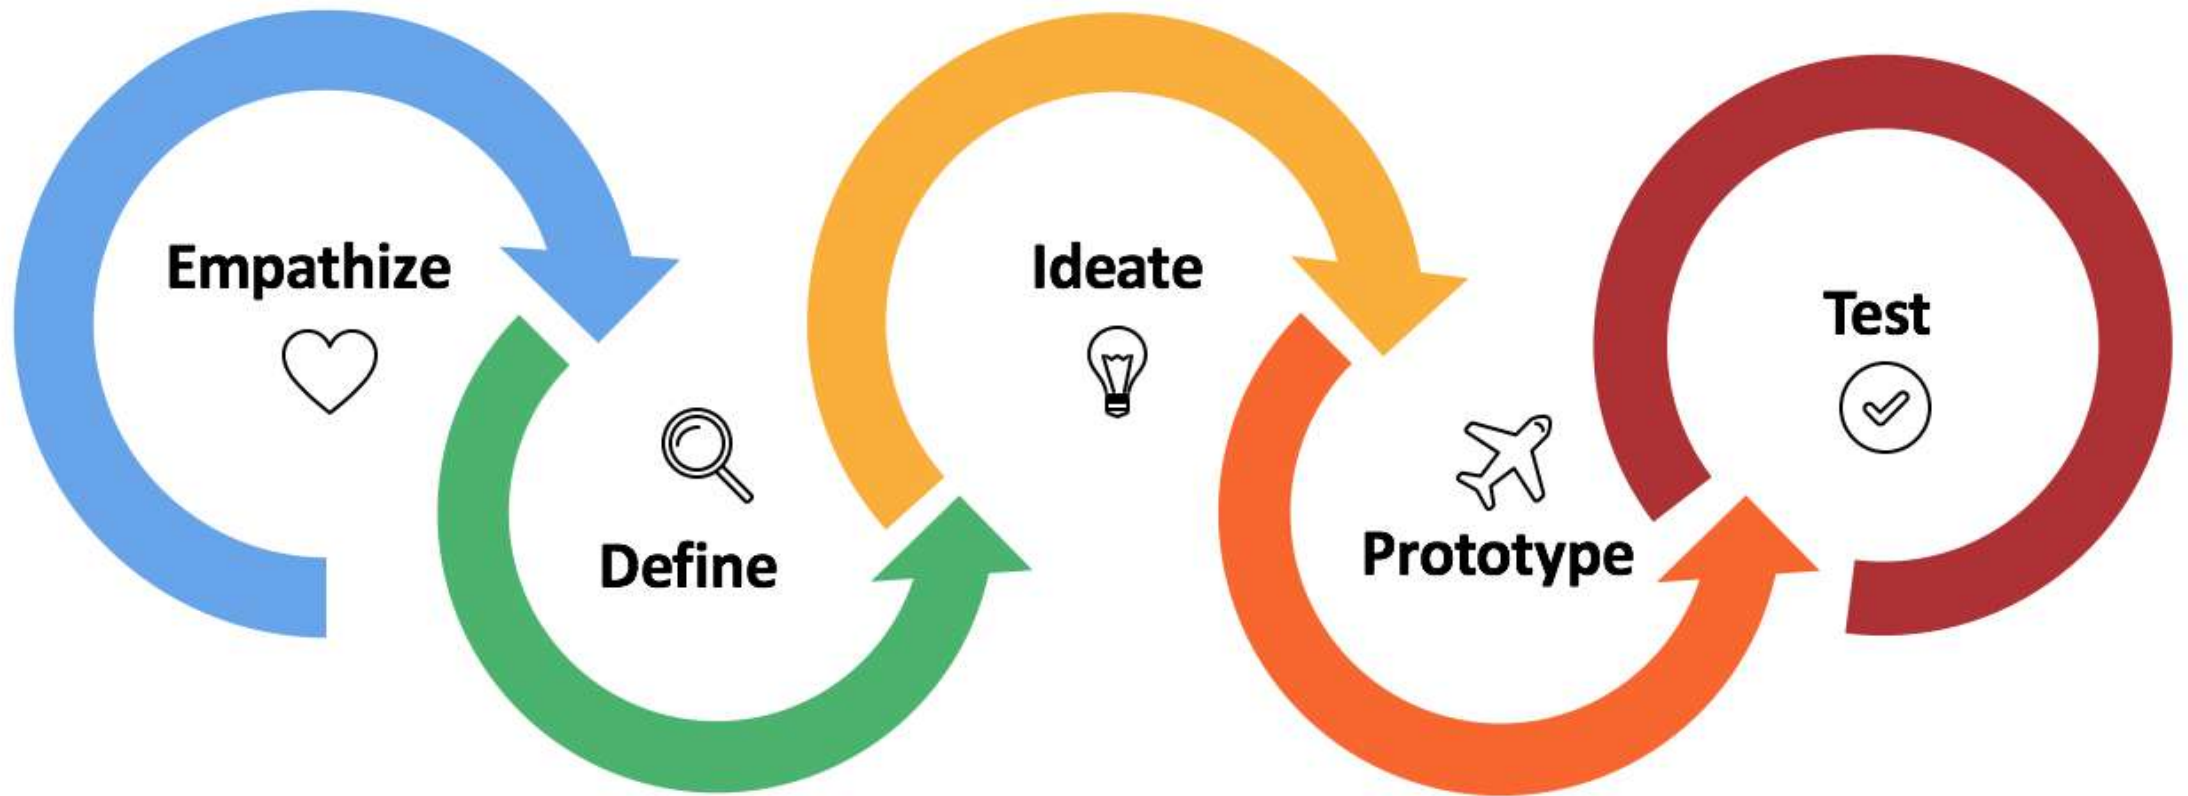

CRC/C/CC/

103. States should encourage and invest in research and development that focus on children's specific health needs and promote positive health outcomes for children through technological advances. Digital services should be used to supplement or improve in-person provision of health services to children.* States should introduce or update regulation that requires providers of health technologies to embed children's rights in their functionality, content and distribution.

19. When developing laws, policies, programmes, services and training on children's rights in relation to the digital environment, States should involve children, especially children in disadvantaged or vulnerable situations, and victims of harm related to the digital environment, listen to their needs and give due weight to their views. States should ensure that designers and providers of digital technologies and services actively engage children, applying appropriate safeguards, and give their views due consideration when developing their services.

User-centred design

Lundy Model

This model provides a pathway to help conceptualise Article 12 of the UNCRC. It focuses on four distinct, albeit interrelated, elements. The four elements have a rational chronological order.

Space

HOW: Provide a safe and inclusive space for children to express their views

- Have children's views been actively sought?
- Was there a safe space in which children can express themselves freely?
- Have steps been taken to ensure that all children can take part?

Voice

HOW: Provide appropriate information and facilitate the expression of children's views

- Have children been given the information they need to form a view?
- Do children know that they do not have to take part?
- Have children been given a range of options as to how they might choose to express themselves?

Audience

HOW: Ensure that children's views are communicated to someone with the responsibility to listen

- Is there a process for communicating children's views?
- Do children know who their views are being communicated to?
- Does that person/body have the power to make decisions?

Influence

HOW: Ensure that children's views are taken seriously and acted upon, where appropriate

- Were the children's views considered by those with the power to effect change?
- Are there procedures in place that ensure that the children's views have been taken seriously?
- Have the children and young people been provided with feedback explaining the reasons for decisions taken?

Benefits of involving CYP

Improved functionality

Reduction in product failure

Quality

Effective Usage

Usability

Customer satisfaction

Acceptability

Product sales
