

# ORPHADEV4KIDS Project

Advancing Medical  
Device Paediatric  
Research

## About us.

ORPHADEV4KIDS Project is a consortium of researchers and clinicians aiming to address the issue of Orphan medical devices (MDs) to be used in the paediatric population.

## Goals

To implement an innovation ecosystem in the orphan and paediatric MDs field to maximise the value-for-patients of the research and development projects supported by the Consortium.

### Services provided by ORPHADEV4KIDS Project

- Matchmaking service - access to experts in MDs development from R&D to regulatory approval and market access.
- Access to financial opportunities
- Access to a regulatory database
